TESTORI GROUP

Leading the way to filtration

INTRO

With over a century of experience, we take pride in being a global leader in filtration and technical textile solutions.

Our commitment to innovation, quality and sustainability drives us to deliver high-performance products tailored to meet the evolving needs of various industries.

To achieve this, we are dedicated to providing unparalleled service and support to our customers. At Testori, we believe in the power of partnership; together, we can continue to build a cleaner, better and more sustainable future.

Alessandro Bernardini, Managing Director

Alessandro Bernardini

ABOUT US

Welcome to Testori, the Italian world leader in filtration.

Testori is an industrial group active for over **120 years** in the technical textile field; more specific, in industrial filtration for production and environmental protection processes.

The Group is made up of **9 companies**: Testori is acknowledged as market leader in Italy, one of the main players in Europe and boasting a constant growing successfull presence in overseas markets.

Testori's **core business** is in the design, production and marketing of textile items (fabrics, felts, cloths, bags etc.) for solid separation from gas and liquid. Testori's operations cover the entire value chain, from processing the raw materials (fiber and yarn) throughout the production of ready-made products.

Testori offers in addition **pre and post assistance services** (lab analysis, bags and cloths installation, maintenance, technical, auditing and consultancy).

Our product range finds application in almost all industries, both in primary and secondary sectors, from raw material extraction and processing to manufacturing of finished goods.

Testori's proposition fully meets the needs of all industry players: end users, bags/ cloths fabricators, Original Equipment Manufacturers (OEMs) and EPC.

We are **UNI EN ISO 9001:2015 certified**. Quality is an integral part of our policy, upheld by an **internal committee,** in charge to oversees all activities to ensure the high level of performance and service in compliance with the most demandeing international standards and market needs.

OUR VALUES

At Testori, we believe that sharing and promoting ethical values, both personal and professional, are keys to building a culture of excellence. These principles drive our commitment to customer orientation, innovation, sustainability, and business integrity.

Our mission is to lead the filtration industry by mastering high-quality and original solutions, tailored for industrial applications and environmental protection.

Our vision is to be the global benchmark in filtration technologies, distinguished for our commitment to excellence and our ability to promptly adapt our value proposition to the evolving needs of diverse industries.

Our **entrepreneurial spirit** drives us to embrace challenges and opportunities in an ever-changing marketplace. We believe in conducting our **business** with unwavering **integrity,** ensuring that our relationships with customers, employees, and all relevant stakeholders are built on trust and transparency.

Our **dynamic approach** enables us to respond swiftly to market demands, address diverse cultural expectations and capitalize on emerging trends.

As outlined in our "Code of Conduct", and in compliance with Environmental, Social, and Governance (ESG) directives and principles, we proactively and responsibly take care of:

- Ensuring environmental sustainability and addressing climate change
- Promoting a safe, inclusive, and respectful workplace (Testori is UNI/PdR 125:2022)
- Valuing and enhancing diversity by recognizing individuals' unique backgrounds and perspectives
- Contributing to society improvement
- Conducting activities with legality, fairness, and honesty.

KEY FACTORS

Testori Group's affirmation as a leading player in the filtration industry has been build for more than a century on strategic pillars, which enabled us to navigate multiple challenges and seize future opportunities.

Brand. The direct involvement of the owning family, whose name has been nestled in the company brand since its foundation, has guaranteed the consistent Group growth in the ever-changing market scenario.

Know-how. Our deep industry knowledge and expertise has been empowering us to deliver effective as well as tailored solutions for our clients' specific needs.

Innovation. Aiming at strengthening our role as pioneer in filtration technology, we bestow an important role to R&D activities and investments. Our commitment to innovation is evident in our wide range of products, from traditional filters to cutting-edge solutions that address the evolution of different applications.

Vertical Integrated Production. As "one-stop solution" supplier, we manage the entire production process, from design to manufacturing, ensuring flexibility and responsiveness. Moreover, our manufacturing approach, rooted into the Italian design and quality tradition, guarantees top-tier products.

Internationalization. One of Testori's competitive advantages resides in the ability to apply global knowledge in local contexts, extending its growth beyond borders. Being an international company, we are able to ensure proximity to customers thus delivering specific solutions and reactive service.

Needlefelts, used primarily for gas filtration and occasionally for liquid filtration, are produced from a variety of fibers and offered in different weights. The selection of the most suitable fiber, chosen from a wide range, depends heavily on the specific application and process conditions. To optimize dust-cake removal and enhance resistance to chemical exposure and abrasion, we apply specialized finishing treatments, such as thermo-setting, glazing and impregnation.

Fabrics, used in both gas and liquid filtration, are offered by Testori in a comprehensive range of materials, including cotton, polyester, acrylic, polypropylene, polyamide, and aramid. These fabrics are also available in antistatic versions to prevent electrostatic discharge risks, typical of industries such as chemical, pharmaceutical, and food.

The range includes fabrics made from 100% staple, monofilament or multifilament yarns, as well as combinations thereof like mono-multi or multi-staple. With various weaving patterns, such as plain, twill, and satin, and specialized finishing techniques like calendering, our wovens ensure optimal performance by enhancing durability, capacity, resistance to clogging, and efficient cake release.

HANDMADE PRODUCTS.

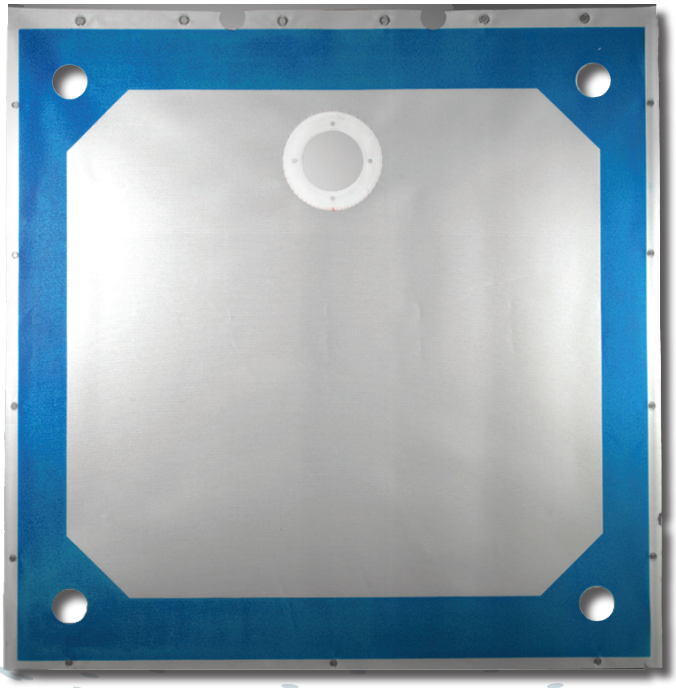

GAS FILTRATION:
- Filter bags
- Multi-channel bags
- Star bags
- Baghouses / Reverse air bags

PHARMA:
- Octopus bags
- Centrifuge bags
- Disc filters

LIQUID FILTRATION:
Bags for:
- Pressure filter
- Vacuum disc filter

Cloths for:
- Horizontal Press Filter
- Vacuum Drum Filter

Belts for:
- Press belt filter
- Vacuum Belt filter

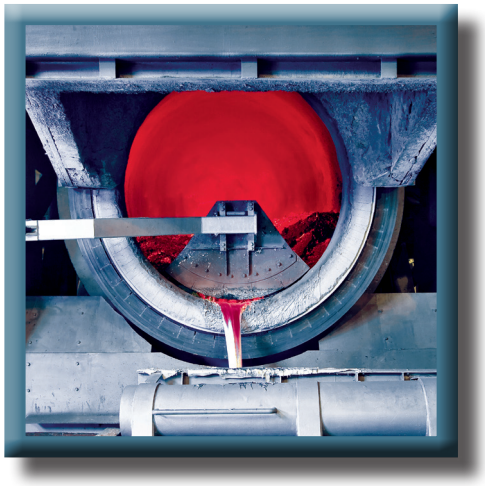

SERVICE

An **Expert Assessment Service** is also provided to **improve the performance levels** of customer's filters **or** even to contribute **troubleshooting a specific problem**: our specialists can carry out both **lab investigations** and on **site work** to observe, measure, analyze,and diagnose a solution when needed or to suitably train customer teams assigned to filters maintenance and supervision. Testori offers **complete assistance during installation and assembly** of filter elements all over the world, making use of specialized **maintenance teams**.

APPLICATIONS

The main fields of application, where Testori has grown its unique level of expertise and specialization, are:

- industrial process filtration
- environmental protection filtration
- non-filtration use based on technical textile items (drying, conveying, sealing, supporting, protecting, etc.)

Applications:

- **Aluminum & Alumina**
- **Asphalt**
- **Cement & Lime**
- **Chemical Industry**
- **Energy & Waste to Energy**
- **Food & Beverage Industry**
- **Mining & Refining**
- **Pharma Industry**
- **Steel Works & Foundries**
- **Wastewater Treatment**
