

TESTORI SOLUTIONS FOR NEXT GENERATION ASPHALT PLANT

FEATURES

- **Maximum filtration efficiency** achieved through microfelt
- **Reduction of deep fine-dust penetration**
- **Optimized Δp** behavior for minimized energy consumption
- **Increased robustness** due to high textile mechanical strength
- **Temperature resistance** up to 160 °C, with peaks up to 180 °C

The graphic shows the results of the **VDI 3926 Filter Test,** confirming **lower dust emissions** compared to standard materials thanks to **integrated microfibers**, coming along with low energy consumption through **controlled Δp conditions.**

APPLICATIONS

- **ASPHALT PLANTS**
- **CEMENT CLINKER COOLERS**
- **VERTICAL LIME KILNS**
